'C-130J MODEL' PACKAGE CONTENT OVERVIEW

The 'C-130J Model' package is available at www.captainsim.com as an expansion to the **'Legendary C-130'** base package.

The 'C-130J Model' expansion package is fully compatible with both versions ('Standard' and 'Pro') of the 'Legendary C-130' base package and with the retail 'boxed' version of the C-130 published by Just Flight.

THE 'C-130J MODEL' INSTALLATION WITHOUT C-130 BASE PACKAGE BEING PREINSTALLED

The 'C-130J Model' expansion package does not require any C-130 base package and can be installed to default installation of the MS FS2004.

In this case user will get the following C-130J setup:
- Original Captain Sim C-130 Flight Model (aircraft.cfg and .air files)
- Original Captain Sim set of C-130J Models
- Sound - Alias to default Beech King sound
- Panel - Alias to default B747 panel
- No textures in VC
- No gauges in VC

MODELS

Upon installing the **C-130J 'Hercules'** aircraft will appear under Captain Sim manufacturer in the MS FS9 Aircraft Select Menu.

The model is available in the following variations:

LIVERIES

PACKAGE LIVERY

The following liveries are included in the package:

- RAF (UK) current grey
- Italian Air Force current grey
- USAF current grey (175th Wing)

Note:
The C-130J model textures are not fully compliant with C-130E model textures because of some differences between the 'J' and the 'E' airframe and engines design.
